

Fill the Stairs Game Sheet

Roll the two 10-sided dice to make a two-digit number, and write it in on one of the stairs. Each number you write in must be bigger than all the numbers below it, and smaller than all the numbers above it. If you can't use a number, write down the discard number under the stairs, and that ends your turn.

The game is over when someone fills in all the steps in their staircase.
