

HCS Math Spiral 2020-21

Learning Period 5

April 1 – May 27 (Spring Break: April 2 – 9)

Objectives: Review

The objective of this math spiral is to help students review past material and fill-in key holes that have been identified by upper grade math teachers as being problem areas for students. Our hope is that you will do a problem set per day (2-3 problems) either before or after your math lesson. These problems should not take more than 10 min. if they are taking your student longer, move on and come back to the problem set once you've covered the subject in your material. This is not to be used as a one-day worksheet; the effectiveness is in the daily, small review.

At the end of each learning period your EC will have a short benchmark test for your student to take, in office, which will cover the standards covered on the spiral from this learning period.
