

Ideas for Independent Student Work

As soon as possible, begin to develop independent educational activities that are age appropriate for each child. There will be multiple times throughout the day when a parent/teacher will need some time to get ready for the next activity or to have time to work with an individual child. It can be really helpful to have some bookmarked Internet sites, some tubs with materials for independent tasks, and a variety of books set-aside to ensure that time gets used productively and doesn't get wasted.
