Introduction

Welcome to Transitional Kindergarten, Kindergarten and First Grade! These years will be some of the most frustrating **and** rewarding years of your family's life. You will be teaching your child tools for his/her future academic success and building a sense of family that will last a lifetime.

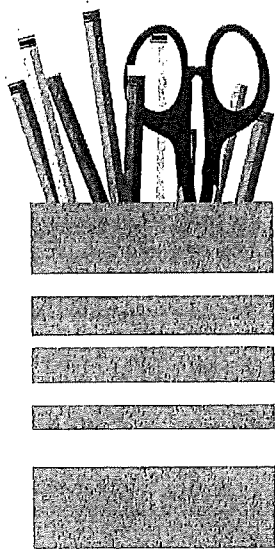

Karen Rossi, a kindergarten teacher for decades, originally created this handbook filling it with her teaching philosophy and tips. Being classroom teachers and then homeschooling moms, we fell in love with her child-centered philosophy and useful activities. This handbook can be your only curriculum or you can use it in addition to other curriculums.

We know these years may be a struggle, but with the assistance of this handbook and the Hickman Charter School community, they will also be an amazing success.

As Mrs. Rossi continually reminds us,
"Have Fun!"
