

February's Problems

March 2014

K-2

Eddie went to the beach and collected 21 shells to share with his 3 friends. Three shells broke on the ride home. If the rest of the shells are shared evenly between Eddie and his 3 friends, how many shells will each of the children get? Will he have any shells left over?

- *problem solving tips: act it out or use objects*

3-5

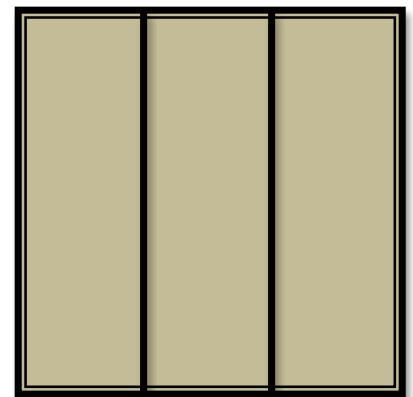

Emma, Clara and Janna were comparing how much money they had. Emma and Clara together had \$17, Clara and Janna together had \$13, and Janna and Emma together had \$10. Which one of the girls had the most money? How much money did she have?

- *problem solving tips: guess and check
use logical reasoning*

6-8

Abby made a giant square bulletin board for her room. She divided it into three congruent rectangles. Each of the rectangles had a perimeter of 20 feet. What was the perimeter of the whole bulletin board?

- *problem solving tips: use a picture or diagram
use logical reasoning*

Don't forget to use the checklist on the other side to make sure that your solution is complete.
